SUBIKSHA S

Software Engineer & AI Developer | B.E. Computer Science & Engineering

subikshaelango49@gmail.com ■ +91 8122592905 ■ linkedin.com/in/subiksha-s-815a59323

PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA 8.9/10, graduating May 2027) with 3 internships and 3 shipped software projects in AI, computer vision, IoT, and Android development. Achieved 87% ML model accuracy, 40% reduction in UI bugs, and 25% decrease in energy wastage. Proficient in Python, Java, Kotlin, React, Django, TensorFlow, AWS, and Azure. Seeking a Software Engineering or AI Engineering role.

TECHNICAL SKILLS

Languages: Python, Java, C, Kotlin **Web:** HTML5, CSS3, JavaScript, React, Next.js **Backend:** Django, Appwrite, REST APIs **Databases:** MySQL, MongoDB **Cloud:** AWS, Microsoft Azure **AI/ML:** Machine Learning, Computer Vision, TensorFlow, Keras, OpenCV **Tools:** Git, Android Studio, Flutter, VS Code

INTERNSHIP EXPERIENCE

Frontend Development Intern — Alfido Tech June 2025 – July 2025

- Engineered 3+ responsive web pages in HTML, CSS, and JavaScript, cutting UI layout bugs by 40% through cross-browser testing across 4 browsers.
- Converted Figma mockups into production-ready UI components achieving less than 5% deviation from design specs, reducing rework by 20%.

Software Engineering Intern — Synapsyz Innovations LLP June 2025 – August 2025

- Built and deployed 3 web application modules using Python, Django, React, and Next.js within a 45-day sprint, contributing to live software releases.
- Automated Linux-based CI/CD pipelines using Appwrite, cutting manual release effort by 35% and standardising deployments across 2 environments.

Frontend Development Intern — Micro Information Technology Services May 2025 – June 2025

- Redesigned 5+ web pages using a mobile-first methodology, improving responsiveness scores by 30% across all device templates.
- Resolved 10+ critical layout defects in the design system and delivered complete UI handoff from wireframe to deployment within a 4-week sprint.

PROJECTS

LifePause AI — AI-Powered Women Safety Monitoring System — March 2026 – Present

- Architected an Android application in Kotlin and Jetpack Compose that processes accelerometer, gyroscope, and GPS data to trigger emergency alerts within 2 seconds of threat detection.
- Built voice-activated SOS, real-time GPS tracking via Google Maps API, and SMS fallback alerts to ensure coverage in zero-network environments.

SmartPower — IoT Energy Monitoring System — November 2025 – January 2026

- Engineered an IoT power consumption tracker in Python, MySQL, and Matplotlib on Raspberry Pi hardware, cutting simulated energy wastage by 25% through threshold-based automated alerts across 6 device categories.

Sign2Speech — Real-Time Sign Language Translator — May 2025 – December 2025

- Trained a convolutional neural network to 87% accuracy on a 26-class ASL dataset using TensorFlow, Keras, and OpenCV; optimised inference pipeline to under 1.2 seconds latency.
- Presented at YESIST12 2025 International Student Project Expo and PECTEAM 2K25 Technical Conference, competitively selected from the department cohort.

EDUCATION

B.E. Computer Science & Engineering — Panimalar Engineering College, Chennai August 2023 – May 2027

- CGPA: 8.9 / 10.0 | Relevant Coursework: Data Structures & Algorithms, Database Management, Machine Learning, Operating Systems, Computer Networks.
- Competitively selected for YESIST12 2025 International Expo and PECTEAM 2K25 Technical Conference; ranked in top 10% of department cohort.

Higher Secondary Certificate (HSC) — Brindhavan Higher Secondary School June 2021 – April 2023

CERTIFICATIONS

- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional (Oracle) • Microsoft Certified: Azure Fundamentals • AWS Cloud Technical Essentials (Amazon Web Services)
- Machine Learning – 4-week programme (NoviTech R&D) • Artificial Intelligence – 6-week programme (NoviTech R&D) • Java Programming Fundamentals (Infosys Springboard)
